ROUTINE WORK IN LEGISLATURE

Act Respecting Mechanics' Institutes To Be Given Third Reading Next Wednesday.

Yesterday's session of the legislature was given over to the consideration of various bills now in course of legislation. Some discussion arose in committee of the whole over Mr. G. W. Woolf's motion to postpone. As a result of the discussion, section 1 of the bill will be restored, making it quite certain that the Act referred to will finally pass. This was necessary, because in the south, as Mr. Morrison told Mr. Woolf, there were many laymen who come such a pest in places that they must be killed by poison.

A bill to amend the Law Amendment Act, introduced by Hon. Mr. Cross, was given a first reading and will be thirded on Monday next. An "Act to Amend the Mechanical Charter," introduced by Hon. Mr. Morrison, was read a second time and referred to the Committee on Municipal Law.

In the afternoon the whole house considered a number of bills. The provisions of "An Act Respecting the Protection of Aliens," and A. M. were thrashed out at length and the bill reported with amendments made. The bill, introduced by Hon. Mr. Magrath,¹ was read a second time and referred to the Committee on Municipal Law.

The house then adjourned until the following session.

1. What price did the government pay for the Blairstown telephone system?

2. The names of the parties from whom it was purchased?

3. What means did the government take to add to the value of the plant?

Mr. Robert will ask the Minister of Public Works on Tuesday next the full details.

1. What price did the government pay for the Blairstown telephone system?

2. The names of the parties from whom it was purchased?

3. What means did the government take to add to the value of the plant?

Reply to Questions.

Hon. Mr. Rutherford made the following replies to questions made by A. J. McLeod, M.P., for the Athabasca River:

Question:—(1) What sums of money have been paid to any person whatever from the date of September 1, 1905, to the last day of December, A.D. 1907?

A.—Government Printer \$ 317.60

Elections 125.22

(b) The first day of January, A.D. 1906, to the last day of December, A.D. 1907?

TAYLOR THINKS CITY WILL GAIN BY DELAY

Electrical Expert Advises Counsel at Peterborough—No Provision Made for Trunking to Include Stratford.

Charles E. Taylor, the electrical expert who has gone east for the city to investigate the Lorimer and Strowger telephone systems, has just returned looking into the Strowger manufacture at that city. He will likely leave there Saturday morning and return to Edmonton early in the week.

Apart from the general question of the relay that has already taken place in some parts of Edmonton, one of almost equal importance in the correspondence of Mr. Taylor is the question of the telephone system in Stratford. Should the Lorimer system be installed?

The latter matter was first introduced by a telegram from Mr. Taylor asking in the Morrissey correspondence whether he had been asked to bring up or Stratford or does he ask for further information.

The reply from the city was that all the calls received from the Lorimer people had been that the trunking system of the Lorimer was not suitable for the telephone business in principle. Other inquiries have been evaded or ignored.

A letter was first thought by the city commissioners that the one central in Edmonton would be used for both cities. Mr. Taylor's report has shown that the Lorimer people think differently and they have now sent the city an order to have a second central in Edmonton in which they hope to compete with the Lorimer in principle. Other inquiries have been evaded or ignored.

A letter was first thought by the city commissioners that the one central in Edmonton would be used for both cities. Mr. Taylor's report has shown that the Lorimer people think differently and they have now sent the city an order to have a second central in Edmonton in which they hope to compete with the Lorimer in principle. Other inquiries have been evaded or ignored.

On Feb. 10, Mr. Taylor's last letter, dated Feb. 4th, in dealing with the question of trunking, he writes:

"I have visited Peterborough. I have got a good deal of time to go over the city all point but have met with nothing to change my opinion as expressed in my first letter to you. I will tell you again that the trunking system between the two cities would be made by a 20 pair cable stretched across the river."

In Mr. Taylor's last letter, dated Feb. 4th, in dealing with the question of trunking, he writes:

"I have visited Peterborough. I have got a good deal of time to go over the city all point but have met with nothing to change my opinion as expressed in my first letter to you. I will tell you again that the trunking system between the two cities would be made by a 20 pair cable stretched across the river."

First Application of New Act.

Vancouver, Feb. 13.—The first application of the Natal Act was made this morning on the arrival of the steamer Iroquois from Seattle. Two men were examined and all admitted. The Hindu could speak good English and the Chinese spoke English.

The Japanese also easily passed the educational test. Interest is growing in the new act and it is expected that the C.P.R. liner Arashio, which is reported to have two hundred Hindus aboard, will be here next week.

The Chinese passengers advised the Federal and provincial authorities.

Senate Committee Passes Lancaster Bill

Ottawa, Feb. 13.—The Hamilton Royal Canadian Electric Railway bill passed this morning after nine days of obstinate debate. Subsequent to the introduction of the bill into the Senate the bill was referred to the Standing Senate Committee on Bills in Session.

I do not think the company is very responsible for this indecision. They waited until we had written them no letters.

They asked us to submit their intentions in which they asked your suggestion to assist further information to be given.

Proceeding further Mr. Taylor goes in detail into the changes and the bill in the Senate and the bill in the House of Commons.

"I might say that even if we do operate Stratford and continue to do so, I am not in a position to do so unless we have a trunk line to the west. It is a matter of only a few years before we have a sub-base in the West and the Canadian Pacific will have to have a trunk line to the West.

"My own opinion is that Edmonton will gain in the end by the long delay they have suffered. I say this with regard to the Strowger system. The best improvement that has taken place, not only in the Lorimer apparatus, but also in the telephone system makes of the manually operated."

N. S. LEGISLATURE OPENS.

Speech From Throne Forecasts Some Important Legislation.

Halifax, N.S., Feb. 13.—Lieut. Governor Fraser opened the second session of Nova Scotia's thirty-second legislature with a speech in which he reviewed the weather with all the brilliancy and impressiveness which has long marked the career of the premier. The weather was with him, and he was in fine form.

Among the important matters which will come before the House this session is the bill to extend the franchise to women. A motion for the better payment of common school teachers, a measure for the protection of industrial vital statistics, and measures dealing with old age pensions.

The speech expressed the hope that the financial situation may be sufficiently improved to allow the government to commit itself to arrange for the Halifax and Guysborough bridge construction, the extension of the telegraph system of intercolonial and immigration; a technical school system; an improved road net.

The coming session will be a test of the financial condition of the province and the adjustment of provincial subsidies were also referred to.

Banking Crisis Is Past.

Calgary, Feb. 13.—Representatives of the Canadian Bank of Commerce, the Bank of British Columbia and the Bank of Montreal are anxiously watching the fate of the measure proposed by Bunderpath, pertaining to the banking system. The bill has been introduced in the Legislature and is awaiting the signature of the premier.

The speech expressed the hope that the financial situation may be sufficiently improved to allow the government to commit itself to arrange for the Halifax and Guysborough bridge construction, the extension of the telegraph system of intercolonial and immigration; a technical school system; an improved road net.

The coming session will be a test of the financial condition of the province and the adjustment of provincial subsidies were also referred to.

Indemnity Assured.

Winnipeg, Feb. 13.—D. P. Davis was arrested today on the charge of indemnity against the Bank of Montreal. This is the second offence of the same nature within 24 hours. The other culprit is not caught yet.

Seed Grain Distribution.

Saskatoon, Feb. 13.—W. R. Mathewell left this afternoon for Winnipeg in response to a telegram from Ottawa in connection with the distribution of seed grain.

FOURTEEN YEAR SENTENCE.

Handed Out by Judge Winters in Horse Trial in Medicine Hat.

Medicine Hat, Alta., Feb. 13.—Indictments for a speedy trial and were arraigned before Judge Winters in the District Court, with fifteen horses from Chief Porcupine, another from Darknight, and one from Chalky.

The horses were fitted with halter muzzles and were held in half a mile of the city and the accused was charged with assault on a horse and a dog.

La Framboise.

However, he has had a bad reputation for such foolish acts and was called before His Lordship Bishop Hart, who gave him a subsequent address before the Anglican Synod.

His Lordship dealt with the question of his conduct and his desire to marry his sister.

It was pointed out that such unions were unlawful and that the church would not give him all right to partake of Holy Communion.

The canons of the church could not be violated.

They were based on scriptural authority.

His Lordship said in part: "I have given to a topic which was late by a number of subjects which are the law of marriage in England and Canada; the Christian law of marriage is declared in the table bound up in our prayer book. It seems desirable that should we wish to marry."

The Christian law of marriage is that of a man of primary importance.

He admitted that the church is bound to educate and observe it.

TOUCHING THE PUBLIC HEALTH

The renovating committee of the city council has undertaken the reorganizing department to a process akin to the function that this department is designed to discharge in the scheme of municipal government. There was ample ground for the task in the fact that despite the fortunes we have had in several years past five years we lost \$2,000 last year to hand the regime from our back yards. Admitting freely the altitude of cleanliness in the scale of public and private virtue it was still generally felt that cleanliness at that price was a trifling steep for a city of some 100,000 inhabitants.

The findings of the committee quite justify this conclusion, while their recommendation points the way to an order of things that cannot well be worse, and that ought to be very much better. A public service performed under such circumstances may not always be efficient and effective, but it would be wrong not to require performance in either direction to give the city better value for the money spent than we have been getting. During the past year it cost the city more to prevent epidemics than it would have cost to fight them. While health is important, the private and personal public health has to be considered. Whatever the cause or cause, the cost of this has been unquestionably more than it should have been, more than other similarly situated cities have been able to afford, and more than Edmonton could be required to pay until its population is very much more than at present.

Some change should be made forthwith, and the most promising change available appears to be to give a reliable party a contract for the city scavenging.

In the discussion anent the administration of the scavenging department Monday evening reference was made to the isolation hospital. This institution appears to have had a singularly unfortunate career from the point of view of the city. When it was completed, it was discovered that provision had only been made for four wards, and an arrangement made for temporarily accommodating male and female patients suffering from the same disease. This meant that the hospital was really capable of accommodating only patients suffering from two kinds of contagious diseases, and that there was no room for the numbered among the victims. This in turn meant that half the cases which the hospital was built to accommodate must be treated in tents or out-buildings. To make matters worse, it is now apparent that some general care had not been given to the patients without the other, thus providing an easy means of access for the scarlet fever germs to the quarter of the patients suffering from miasmas and enabling the typhoid bacilli to visit the apartments of those suffering from the same disease.

Peace River grain.—The Peace River grain is not much appreciated by the natives whose business in life it is to afflict humanity, but it can scarcely be a comforting thought to the patient that whatever disease he may carry thither is quite likely to enjoy the whole series before he gets out of the country again. The circumstances English bankers and foreign correspondents express their gratification at the manner in which said such venture condition.

PEACE RIVER GRAIN.

Toronto Globe.—John Blair, forwarding librarian of Alberta, forwarded wheat and oats grown in the Peace River valley, with the statement that the grain was excellent. The standing of Canada in England and in foreign centres. The greatest concentration of Canadian grain and financial and commercial institutions. In this connection it may be well to recall the statement of Mr. T. C. Williams in his report on the last year's movement of the crops, as well as the meeting the abnormal demand for grain in the market, which will affect the price of grain for many months to come. While there is a tendency toward lower rates of interest, the market price of grain will not advance the price of securities very much, and the market price of grain will be reduced, and the influence to sell would grow less and less, and the market price of grain will be lower and lower, and there is nothing in sight to suggest a return of the recent stringency.

It is pleasing to note the references of Mr. Thomas Drummond on his return to England, and the high standing of Canada in England and in foreign centres. The greatest concentration of Canadian grain and financial and commercial institutions.

In this connection it may be well to recall the statement of Mr. T. C. Williams in his report on the last year's movement of the crops, as well as the meeting the abnormal demand for grain in the market, which will affect the price of grain for many months to come. While there is a tendency toward lower rates of interest, the market price of grain will not advance the price of securities very much, and the market price of grain will be reduced, and the influence to sell would grow less and less, and the market price of grain will be lower and lower, and there is nothing in sight to suggest a return of the recent stringency.

The cost of the institution, too, appears to have been on the increase, especially in view of the increased expense of maintenance. In two years it has cost us \$50,000, and from December 1st the expense has exceeded \$50,000. During the two years the city has been afflicted with no serious epidemic. What the expense of the institution might be under normal circumstances it is difficult to say, but there only be conjectured. For the sake of the city's solvency it is to be hoped it remains a matter of conjecture. In view of these circumstances, the committee would have been justified in coming up with a general plan for the reconstruction or enlargement of the building, and for a more economical management of it in future.

ON THE SIDE.

Cost Britain \$100,000 to get Caid MacLean out of hands of Raial. With no desire to unduly interfere with the gentleman's liberty of action the British Government would be still quite justified in requesting the Caid

to take a lengthy vacation and spend it at home.

The Calgary city council want to know if privilege will be permitted in that city. The query is not understood to have any allusion to academic contests.

Nature signalized the opening of the Ontario Legislature by a blizzard. Fighting representation of the fate that awaits the Legislators when Premier Whitney rises to address them. Perhaps also a gentle hint of what awaits Premier Whitney on polling day.

According to the Mail "The Conservative" policy was designed for the "encouragement of the public interest," and for the encouragement of the public interest, "the interests of the others." It "encouraged" the lumber industry to a three-fold increase in seventeen years, and "conserved" the timber resources by giving away 23,000 square miles for just two cents less than the price of a postage stamp.

Toronto News: "Certainly it should be plain that if political patronage is to enter into the case new commissioners of the caliber of Judge Killarney or of Dr. Mills will not easily be obtained." Testimony to the last effect was given by the members of the Royal Commission on the Railways. The commission has not been made from considerations of political attachment.

Mr. Hiett should have prefaced his Dispensary Bill with a clause abolishing the rules of the House and suspending the British North America Act. Not having so equipped the measure could only have been passed in defiance of both, and only discussed in a spirit of rebellion. The bill was easily cleared to the House of Commons, but did not receive the royal assent.

What is Black Hughes?

At the time of the situation, a Republican Senator was asked as to how much sincerely there was behind the Hughes belief in the presidency. He answered that there was a lot. Pressed as to the identity of the persons of consequence behind it, he said: "There are two men, who are sincere—Frank S. Black and Ervin Wardman. Mr. Wardman is the original Hughes. He is a Republican and he wants a Republican to win, even if that Republican is not Hughes."

Black is Hughes because

WHO WE ARE

The Buyers Syndicate of Winnipeg, Man., are purchasers of bankrupt, assignee and salvage stocks of all kinds, the largest institution of its kind on the American continent now operating stores and warehouses in all the principal cities of America. A Money Saving opportunity that appeals direct to you. AN IMPORTANT business movement commencing at Wagar Bros.

SATURDAY, FEBRUARY 15

AT 10 O'CLOCK A.M.

We shall, by price-cutting, sell this gigantic stock within 13 days before its removal from Edmonton to Winnipeg. This will be the greatest bargain sale of dry goods, ladies' suits, skirts and shoes, clothing for men and boys, shoes, furnishings and furs ever conducted in this country or any other country. We shall put forth such offerings that no matter what the weather conditions may be you will be here to get your share. Every article is guaranteed or your money promptly refunded. Merchants from the country or cities wishing to purchase portions of this stock must call between the hours of 9 a.m. and 10 a.m. as other hours must be reserved for our immense retail trade. Don't miss it, there will be a crowd, but you will be hosted by good natured people. Read these priceless quotations. The entire stock is now being rearranged and remarked. The building will be closed until date of sale which is Saturday, February 15th, 1908.

NOTICE: In addition to Wagar Bros. Stock we include all the merchandise bought by this firm that we could not cancel for spring which is about \$3,000 all told of new merchandise, which we have just opened. As a matter of fact this entire stock in the hands of the Buyers Syndicate Co., which will be sold at 5½ cents on the dollar.

Be sure and don't miss the place, look for the Big Sign and be sure you're right. Do not confound this sale with the so-called closing out sales, etc. This is a legitimate sale. Don't miss it if you value your money. It will pay you to come fifty miles for a Bill of Goods. You might as well try to stop a cyclone as match these prices we are offering. Come early. Only a few days; read the prices, see the Goods, do not take our word for it. Come and see the Wonderful Bargains; they are the best you ever saw. Doors positively not open until 10 a.m. This money raising sale will be the greatest sale ever known or heard of in these parts, or any other place.

MEN'S SUITS

Every garment an art of workmanship and expressly tailored for high class trade. You'll find all newfangled 1908 styles here. Suits made to fit, Woolen and wool lined, large range of patterns, all styles and sizes.
Panic price - 4.19

We guarantee these actually worth \$10.00 or your money refunded.

Extra tailored high grade tweed suits in nobby effects double or single breasted, any size you want, every one a \$13 value
Panic price - 6.49

Pure all wool hand tailored Suits, in tweeds and cashmeres, well tailored effects and styles.
Panic price - 11.45

We guarantee these \$16 to \$18 values, or your money refunded.

Extra swell hand tailored silk and wool mixed tweeds, cashmeres and worsted suits, large range of patterns, hand padded shoulders and best hair cloth front, double or single breasted.
Panic price - 14.40

We guarantee these \$20 and \$22 values or money refunded.

TROUSERS

These are made by Canada's leading manufacturers. Every pair made to fit and hang just right. We know what we say and are here with the goods to back it up. There is some individuality about a man when he gets 20th century trousers on.

NOTICE TO THE PUBLIC
